

PROPERTY FEASIBILITY CALCULATOR

Two minutes to a yes or no on any deal.

How to use it

Step 1	Open the tab for your deal type — Residential or Townhouse.
Step 2	Fill only the blue cells. Everything else calculates and is locked.
Step 3	Read the verdict. Green clears your profit threshold, red does not.
Step 4	The threshold is itself an input. Change it and the verdict follows.

Reading the sheet

Blue cell	You type here.
Grey tile	A headline number, calculated for you.
Sensitivity grid	Profit on cost if retail values and build costs move against you. Red is trouble.

What it works out

Market averages	Average raw land and retail value from your comparables.
Total purchase	Land purchase plus stamp duty.
Gross realisation	Average retail value times the number of dwellings.
Net realisation	Gross realisation less selling costs.
Development costs	Build, council contributions, professional fees, contingency and finance.
Total cost	Total purchase plus total development costs.
Net profit	Net realisation less total cost.
Profit on cost	Net profit divided by total cost. The verdict tests this.

Before you trust it

It is a screen	This sizes a deal quickly. It is not a substitute for a full feasibility, a valuation or advice.
No GST	Sale prices and costs are treated consistently. GST and the margin scheme are not modelled.
No timeline	Finance is a flat percentage, not a drawn-down facility over a project duration.
Worked example	Every tab opens filled in. Type over it.

RESIDENTIAL DEVELOPMENT · FEASIBILITY

Fill the blue cells. Everything else is calculated and locked.

THE DEAL

Raw land comparables

Comparable 1	292.000
Comparable 2	305.000
Comparable 3	298.000
Comparable 4	305.000

Retail comparables

Comparable 1	955.000
Comparable 2	972.000
Comparable 3	960.000
Comparable 4	973.000

Number of dwellings	6
Build cost per dwelling	310.000
Council contributions per dwelling	28.000

RATES

Stamp duty	5,5%
Professional fees	7,0%
Contingency	5,0%
Selling costs	2,5%
Finance costs	6,0%

THE TEST

Profit-on-cost threshold	25,0%
--------------------------	-------

Industry benchmark is 25%

RESULT

NET PROFIT	PROFIT ON COST
\$1.246.038	28,3%

TOTAL COST	GROSS REALISATION
\$4.399.212	\$5.790.000

MEETS THRESHOLD

Verdict tests profit on cost against your threshold.

WHERE THE MONEY GOES

Land and stamp duty	1.899.000	43%	
Build	1.860.000	42%	
Council contributions	168.000	4%	
Professional fees	130.200	3%	
Contingency	93.000	2%	
Finance	249.012	6%	

Share of total cost

SENSITIVITY · PROFIT ON COST

Retail value shift ↓ Build cost shift →

	-10%	-5%	0%	+5%	+10%
-10%	21,6%	18,5%	15,5%	12,7%	10,0%
-5%	28,4%	25,0%	21,9%	18,9%	16,1%
0%	35,1%	31,6%	28,3%	25,2%	22,2%
+5%	41,9%	38,2%	34,7%	31,4%	28,3%
+10%	48,6%	44,8%	41,2%	37,7%	34,4%

A 5% fall in retail value hurts about twice as much as a 5% rise in build cost.

TOWNHOUSE DEVELOPMENT · FEASIBILITY

Fill the blue cells. Everything else is calculated and locked.

THE DEAL

Raw land comparables

Comparable 1	442.000
Comparable 2	455.000
Comparable 3	448.000
Comparable 4	455.000

Retail comparables

Comparable 1	1.160.000
Comparable 2	1.178.000
Comparable 3	1.165.000
Comparable 4	1.181.000
Number of dwellings	8
Build cost per dwelling	395.000
Council contributions per dwelling	34.000

RATES

Stamp duty	5,5%
Professional fees	8,0%
Contingency	6,0%
Selling costs	2,5%
Finance costs	6,5%

THE TEST

Profit-on-cost threshold	25,0%
--------------------------	-------

Industry benchmark is 25%

RESULT

NET PROFIT	PROFIT ON COST
\$962.694	11,8%

TOTAL COST	GROSS REALISATION
\$8.171.106	\$9.368.000

BELOW THRESHOLD

Verdict tests profit on cost against your threshold.

WHERE THE MONEY GOES

Land and stamp duty	3.798.000	46%	
Build	3.160.000	39%	
Council contributions	272.000	3%	
Professional fees	252.800	3%	
Contingency	189.600	2%	
Finance	498.706	6%	

Share of total cost

SENSITIVITY · PROFIT ON COST

Retail value shift ↓ Build cost shift →

	-10%	-5%	0%	+5%	+10%
-10%	5,6%	3,0%	0,6%	-1,7%	-3,9%
-5%	11,4%	8,7%	6,2%	3,8%	1,4%
0%	17,3%	14,5%	11,8%	9,2%	6,8%
+5%	23,2%	20,2%	17,4%	14,7%	12,1%
+10%	29,0%	25,9%	23,0%	20,1%	17,4%

A 5% fall in retail value hurts about twice as much as a 5% rise in build cost.
